<p><b>American Cars, 1946Ð1959</b>-J. “Kelly” Flory, Jr. 2009-12-11 From the resumption of automobile production at the close of World War II through the 1950s, the American auto industry would see the births and deaths of several manufacturers, great technological advances, and an era of dramatic styling as a prospering nation asserted its growing mobility. Cars of this period are among the most iconic vehicles ever built in the United States: the 1949 Ford, the remarkable Studebaker designs of 1950 and 1953, the 1955–1957 Chevrolets, the “Forward Look” Chrysler products, the ill-fated Edsel and many others. This comprehensive reference book details every model from each of the major manufacturers (including independents such as Kaiser-Frazer and Crosley but excluding very low-volume marques such as Tucker) from model years 1946 through 1959. Year by year, it provides an overview of the industry and market, followed by an individual report on each company: its main news for the year (introductions or cancellations of models, new engines and transmissions, advertising themes, sales trends etc.); its production figures and market status; and its powertrain offerings, paint colors and major options. The company’s models are then detailed individually with such information as body styles, prices, dimensions and weights, standard equipment and production figures. Nearly 1,000 photographs are included.</p>

<p><b>The Millionaire Next Door</b>-Thomas J. Stanley 2010-11-30 How do the rich get rich? An updated edition of the “remarkable” New York Times bestseller, based on two decades of research (The Washington Post). Most of the truly wealthy in the United States don’t live in Beverly Hills or on Park Avenue. They live next door. America’s wealthy seldom get that way through an inheritance or an advanced degree. They bargain-shop for used cars, raise children who don’t realize how rich their families are, and reject a lifestyle of flashy exhibitionism and competitive spending. In fact, the glamorous people many of us think of as “rich” are actually a tiny minority of America’s truly wealthy citizens—and behave quite differently than the majority. At the time of its first publication, The Millionaire Next Door was a groundbreaking examination of America’s rich—exposing for the first time the seven common qualities that appear over and over among this exclusive demographic. This edition includes a new foreword by Dr. Thomas J. Stanley—updating the original content in the context of the financial crash and the twenty-first century. “Their surprising results reveal fundamental qualities of this group that are diametrically opposed to today’s earn-and-consume culture.” —Library Journal</p>

<p><b>Addressing Challenging Moments in Psychotherapy</b>-Jerome S. Gans 2021-09-30 This practical and helpful volume details how clinicians can work through various common challenges in individual, couple, or group psychotherapy. Chapters draw upon clinical wisdom gleaned from the author’s 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation. Along with theory and clinical observations, Dr.Gans offers a series of “Clinical Pearls,” pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt and unilateral termination of therapy, the therapist’s loss of compassionate neutrality when treating a couple, and many more. Many of the "Clinical Pearls" prioritize working in the here-and-now. In addition to offering advice and strategies for therapists, the book also addresses concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, Addressing Challenging Moments in Psychotherapy is essential reading for all clinicians, teachers, and supervisors of psychotherapy.</p>

<p><b>Dangerous Boobies</b>-Caitlin Brodnick 2017-09-12 After watching too many family members die of cancer, at age 28, public speaker and comedian Caitlin Brodnick was tested for the BRCA1 gene mutation and tested positive, indicating an 87% chance she'd likely be diagnosed with breast cancer in her lifetime. She had a preventative double mastectomy, thereby becoming an everywoman's Angelina Jolie. Dangerous Boobies: Breaking Up with My Time-Bomb Breasts goes in depth into her experience from testing to surgery and on to recovery. With a warm, funny, and approachable voice, Caitlin tells readers the full story, even sharing what it was like to go from a size 32G bra—giant, for a woman who is barely over five feet tall!—to a 32C. Engaging and open, she admits to having hated her breasts long before her surgery, and enjoying the process of “designing” her new breasts, from the shape of the breasts to the size and color of the nipples. While Caitlin’s primary narrative explores the BRCA gene and breast cancer, her story is also one about body acceptance and what it takes to be confident with and in charge of one’s body. Her speaking engagements and comedy routines have shown that the wider topic of breasts, breast size, and personal identity is resonating with younger readers.</p>
