**Motorized Obsessions**-Paul R. Josephson  
2007-08-22 From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in

deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

**Hoosiers and the American Story**-Madison, James H. 2014-10-01 A supplemental textbook for middle and high school students, *Hoosiers and the American Story* provides intimate views of individuals and places in Indiana set within themes from American history. During the frontier days when Americans battled with and exiled native peoples from the East, Indiana was

on the leading edge of America's westward expansion. As waves of immigrants swept across the Appalachians and eastern waterways, Indiana became established as both a crossroads and as a vital part of Middle America. Indiana's stories illuminate the history of American agriculture, wars, industrialization, ethnic conflicts, technological improvements, political battles, transportation networks, economic shifts, social welfare initiatives, and more. In so doing, they elucidate large national issues so that students can relate personally to the ideas and events that comprise American history. At the same time, the stories shed light on what it means to be a Hoosier, today and in the past.

### **The COVID-19 Crisis**-Deborah Lupton

2021-04-20 Since its emergence in early 2020, the COVID-19 crisis has affected every part of the world. Well beyond its health effects, the pandemic has wrought major changes in people's everyday lives as they confront restrictions imposed by physical distancing and consequences such as loss of work, working or learning from home and reduced contact with family and friends. This edited collection covers a diverse range of experiences, practices and representations across international contexts and cultures (UK, Europe, North America, South Africa, Australia and New Zealand). Together, these contributions offer a rich account of COVID society. They provide snapshots of what life was like for people in a variety of situations and

locations living through the first months of the novel coronavirus crisis, including discussion not only of health-related experiences but also the impact on family, work, social life and leisure activities. The socio-material dimensions of quotidian practices are highlighted: death rituals, dating apps, online musical performances, fitness and exercise practices, the role of windows, healthcare work, parenting children learning at home, moving in public space as a blind person and many more diverse topics are explored. In doing so, the authors surface the feelings of strangeness and challenges to norms of practice that were part of many people's experiences, highlighting the profound affective responses that accompanied the disruption to usual cultural forms of sociality and ritual in the wake of the COVID outbreak and restrictions on movement. The authors show how social relationships and social institutions were suspended, re-invented or transformed while social differences were brought to the fore. At the macro level, the book includes localised and comparative analyses of political, health system and policy responses to

the pandemic, and highlights the differences in representations and experiences of very different social groups, including people with disabilities, LGBTQI people, Dutch Muslim parents, healthcare workers in France and Australia, young adults living in northern Italy, performing artists and their audiences, exercisers in Australia and New Zealand, the Latin cultures of Spain and Italy, Asian-Americans and older people in Australia. This volume will appeal to undergraduates and postgraduates in sociology, cultural and media studies, medical humanities, anthropology, political science and cultural geography.

**People of the Three Fires**-James A. Clifton 1986 This book accompanied by a student workbook and teacher's guide, was written to help secondary school students to explore the history, culture, and dynamics of Michigan's indigenous peoples, the American Indians. Three chapters on the Ottawa, Potawatomi, and Ojibway (or Chippewa) peoples follow an introduction on the prehistoric roots of Michigan Indians. Each chapter reflects the integration of cultural and historical information about the Indians. The chapter on the Potawatomi stresses the political activities and economic forces

affecting the tribe in southwestern Michigan. It includes biographical information on 19th century Potawatomi leaders. The second chapter focuses on the subsistence patterns and indigenous environmental relations of the Ojibway, while touching on the spiritual connotations of their existence. It is a generic treatment of Ojibway life, customs, beliefs, and the subsequent federal policies affecting them. The chapter on the Ottawa provides an extended discussion of their contact with European powers and explores the Indians' responses and adaptations to changing environmental and sociopolitical circumstances. This book contains many historical photographs and a five-page bibliography. (TES)

**A Rancher and a Warrior**-Jessica Robinson 2016-12-26 Lance Dale Robinson dreamed of one day owning his own ranch. Born and raised in a small town in Wyoming, ranching was all he'd ever known and it was all he ever wanted to do. But on his way to achieving that dream, WWII got in the way. He was a heavy machine gunner for Company H of the 313th Infantry. He landed on Normandy Beach 6 days after D-Day, and tells a story of wading through bodies like seaweed to get onto land. He was part of the Battle of the Bulge, where he was almost court-martialed for

thinking his sergeant's life was more important than his weapon. He received a Silver Star, a Bronze Star, and a British Military Medal. When he returned home after his service, he went back into ranching. During his career, Dale worked with the University of Wyoming and Colorado State University to improve artificial insemination of cows. He traveled and lectured about the impacts that were being made in the process, and he helped advance science and ranching. This is the story of Dale's life in Wyoming and in WWII.

**Creation Myths and Legends of the Creek Indians**-Bill Grantham 2009-09-01 "A long-needed study of the creation stories and legends of the Creek Indian people and their neighbors...including the influential Yuchi legends and Choctaw myths as well as those of the Hitchiti, Alabama, and Muskogee." -Charles R. McNeil, Msueum of Florida History, Tallahassee The creation stories, myths, and migration legends of the Creek Indians who once populated southeastern North America are centuries--if not millennia--old. For the first time, an extensive collection of all known versions of these stories has been compiled from the reports of early ethnographers, sociologists, and missionaries, obscure academic journals, travelers' accounts, and from Creek and Yuchi people living today. The Creek Confederacy originated as a political alliance of people from multiple cultural backgrounds, and many of the

traditions, rituals, beliefs, and myths of the culturally differing social groups became communal property. Bill Grantham explores the unique mythological and religious contributions of each subgroup to the social entity that historically became known as the Creek Indians. Within each topical chapter, the stories are organized by language group following Swanton's classification of southeastern tribes: Uchean (Yuchi), Hitchiti, Alabama, Muskogee, and Choctaw--a format that allows the reader to compare the myths and legends and to retrieve information from them easily. A final chapter on contemporary Creek myths and legends includes previously unpublished modern versions. A glossary and phonetic guide to the pronunciation of native words and a historical and biographical account of the collectors of the stories and their sources are provided. Bill Grantham, associate professor of anthropology at Troy State University in Alabama, is anthropological consultant to the Florida Tribe of Eastern Creeks. He has contributed chapters to several books, including *The Symbolic Role of Animals in*

Archaeology.

**An Indigenous Peoples' History of the United States**-Roxanne Dunbar-Ortiz 2014-09-16 2015 Recipient of the American Book Award The first history of the United States told from the perspective of indigenous peoples Today in the United States, there are more than five hundred

federally recognized Indigenous nations comprising nearly three million people, descendants of the fifteen million Native people who once inhabited this land. The centuries-long genocidal program of the US settler-colonial regimen has largely been omitted from history. Now, for the first time, acclaimed historian and activist Roxanne Dunbar-Ortiz offers a history of the United States told from the perspective of Indigenous peoples and reveals how Native Americans, for centuries, actively resisted expansion of the US empire. In *An Indigenous Peoples' History of the United States*, Dunbar-Ortiz adroitly challenges the founding myth of the United States and shows how policy against the Indigenous peoples was colonialist and designed to seize the territories of the original inhabitants, displacing or eliminating them. And as Dunbar-Ortiz reveals, this policy was praised in popular culture, through writers like James Fenimore Cooper and Walt Whitman, and in the highest offices of government and the military. Shockingly, as the genocidal policy reached its zenith under President Andrew Jackson, its

ruthlessness was best articulated by US Army general Thomas S. Jesup, who, in 1836, wrote of the Seminoles: "The country can be rid of them only by exterminating them." Spanning more than four hundred years, this classic bottom-up peoples' history radically reframes US history and explodes the silences that have haunted our national narrative.

**Tecumseh**-John Sugden 2013-07-02 If Sitting Bull is the most famous Indian, Tecumseh is the most revered. Although Tecumseh literature exceeds that devoted to any other Native American, this is the first reliable biography--thirty years in the making--of the shadowy figure who created a loose confederacy of diverse Indian tribes that extended from the Ohio territory northeast to New York, south into the Florida peninsula, westward to Nebraska, and north into Canada. A warrior as well as a diplomat, the great Shawnee chief was a man of passionate ambitions. Spurred by commitment and served by a formidable battery of personal qualities that

made him the principal organizer and the driving force of confederacy, Tecumseh kept the embers of resistance alive against a federal government that talked cooperation but practiced genocide following the Revolutionary War. Tecumseh does not stand for one tribe or nation, but for all Native Americans. Despite his failed attempt at solidarity, he remains the ultimate symbol of eavor and courage, unity and fraternity.

**Native American Heroes**-Ann McGovern  
2014-07-01 November is Native American Heritage month! Osceola, Cochise, and Tecumseh are three Native American heroes who fought valiantly for their land and for their people. Their true stories are emotionally gripping and tragic, and Ann McGovern handles delicate topics, such as violence and racism, expertly for young readers. The narrative text is supplemented by black-and-white original source materials throughout (i.e. photographs, maps,

portraits, a newspaper article).

**The Tractor in the Haystack**-Scott Garvey For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have made their secret hideaways. These are the classic tractors that are often as hard to find as a needle in a haystack—but far more fun to discover, as all of these delightful stories make abundantly clear.

**The Jungle**-Upton Sinclair 2017-06-19 The Jungle is a 1906 novel written by the American journalist and novelist Upton Sinclair (1878-1968). Sinclair wrote the novel to portray the lives of immigrants in the United States in Chicago and similar industrialized cities. Many readers were most concerned with his exposure of health violations and unsanitary practices in the American meatpacking industry during the early 20th century, based on an investigation he did for a socialist newspaper. The book depicts working class poverty, the lack of social supports, harsh and unpleasant living and working conditions, and a hopelessness among many workers. These elements are contrasted with the deeply rooted corruption of people in power. A review by the writer Jack London called it, "the Uncle Tom's Cabin of wage slavery."

Sinclair was considered a muckraker, or journalist who exposed corruption in government and business. He first published the novel in serial form in 1905 in the Socialist newspaper, Appeal to Reason, between February 25, 1905, and November 4, 1905. In 1904, Sinclair had spent seven weeks gathering information while working incognito in the meatpacking plants of the Chicago stockyards for the newspaper. It was published as a book on February 26, 1906 by Doubleday and in a subscribers' edition.
