**Woodstock Nation**-Abbie Hoffman 1969 "Abbie Hoffman, Yippie non-leader, notorious dope addict and up-and-coming rock group (the WHAT), is currently on trial with seven others for conspiracy to incite riot during the Democratic Convention. When he returned from the Woodstock Festival he had five days before leaving for Chicago to prepare for the trial. Woodstock Nation, which the author wrote in longhand while lying upside down, stoned, on the floor of an unused office of the publisher, is the product of those five days. Other works by Mr. Hoffman include Revolution for the Hell of It and Fuck the System, which he describes as a "tender love epic"."-- Back cover.

**Concepts of Biology**-Samantha Fowler 2018-01-07 Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

**From Paesani to Global Italians**-Loretta Baldassar 2005 From Paesani to Global Italians is a study of the migration history and experiences of migrants from the Veneto region in the northeast of Italy. Veneto, which includes the province of Venice, is today one of the most affluent regions in Italy. Migration from the Veneto to Australia began in the late 1800s, although the bulk of the migrants arrived immediately after the Second World War. Most northern Italian migrants to Australia come from this region. The authors explore the contribution made by this group of migrants to their new homeland, their settlement experiences, and their continuing connections with their ancestral homes. The authors also touch on the future of ethnic groups and the crisis in aged care for people of non-English speaking backgrounds. The text is enlivened by life histories, character portraits, and quotations.
