| The Psychology of Everyday Things -Donald A. Norman 1990-05-01 |

The Design of Everyday Things-Don Norman 2013-11-05 Even the smartest among us can feel inept as we fail to figure out which light switch or oven burner to turn on, or whether to push, pull, or slide a door. The fault, argues this ingenious—even liberating—book, lies not in ourselves, but in product design that ignores the needs of users and the principles of cognitive psychology. The problems range from ambiguous and hidden controls to arbitrary relationships between controls and functions, coupled with a lack of feedback or other assistance and unreasonable demands on memorization. The Design of Everyday Things shows that good, usable design is possible. The rules are simple: make things visible, exploit natural relationships that couple function and control, and make intelligent use of constraints. The goal: guide the user effortlessly to the right action on the right control at the right time. In this entertaining and insightful analysis, cognitive scientist Don Norman hails excellence of design as the most important key to regaining the competitive edge in influencing consumer behavior. Now fully expanded and updated, with a new introduction by the author, The Design of Everyday Things is a powerful primer on how—and why—some products satisfy customers while others only frustrate them.

The Joy of the Gospel-Pope Francis 2014-10-07 The perfect gift! A specially priced, beautifully designed hardcover edition of The Joy of the Gospel with a foreword by Robert Barron and an afterword by James Martin, SJ. “The joy of the gospel fills the hearts and lives of all who encounter Jesus... In this Exhortation I wish to encourage the Christian faithful to embark upon a new chapter of evangelization marked by this joy, while pointing out new paths for the Church’s journey in years to come.” - Pope Francis This special edition of Pope Francis’s popular message of hope explores themes that are important for believers in the 21st century. Examining the many obstacles to faith and what can be done to overcome those hurdles, he emphasizes the importance of service to God and all his creation. Advocating for “the homeless, the addicted, refugees, indigenous peoples, the elderly who are increasingly isolated and abandoned,” the Holy Father shows us how to respond to poverty and current economic challenges that affect us locally and globally. Ultimately, Pope Francis demonstrates how to develop a more personal relationship with Jesus Christ, “to recognize the traces of God’s Spirit in events great and small.” Profound in its insight, yet warm and accessible in its tone, The Joy of the Gospel is a call to action to live a life motivated by divine love and, in turn, to experience heaven on earth. Blindspot-Mahzarin R. Banaji 2013-02-12 “Accessible and authoritative . . . While we may not have much power to eradicate our own prejudices, we can counteract them. The first step is to turn a hidden bias into a visible one. . . . What if we’re not the magnanimous people we think we are?”—The Washington Post I know my own mind. I am able to assess others in a fair and accurate way. These self-perceptions are challenged by leading psychologists Mahzarin R. Banaji and Anthony G. Greenwald as they explore the hidden biases we all carry from a lifetime of exposure to cultural attitudes about age, gender, race, ethnicity, religion, social class, sexuality, disability status, and nationality. “Blindspot” is the authors’ metaphor for the portion of the mind that houses hidden biases. Writing with simplicity and verve, Banaji and Greenwald question the extent to which our perceptions of social groups—without our awareness or conscious control—shape our likes and dislikes and our judgments about people’s character, abilities, and potential. In Blindspot, the authors reveal hidden biases based on their experience with the Implicit Association Test, a method that has revolutionized the way scientists learn about the human mind and that gives us a glimpse into what lies within the metaphoric blindspot. The title’s “good people” are those of us who strive to align our behavior with our intentions. The aim of Blindspot is to explain the science in plain enough language to help well-intentioned people achieve that alignment. By gaining awareness, we can adapt beliefs and behavior and “outsmart the machine” in our heads so we can be fairer to those around us. Venturing into this book is an invitation to understand our own minds. Brilliant, authoritative, and utterly accessible, Blindspot is a book that will challenge and change readers for years to come. Praise for Blindspot “Conversational . . . easy to read, and best of all, it has the potential, at least, to change the way you think about yourself.”—Leonard Mlodinow, The New York Review of Books “Banaji and Greenwald deserve a major award for writing such a lively and engaging book that conveys an important message: Mental processes that we are not aware of can affect what we think and what we do. Blindspot is one of the most illuminating books ever written on this topic.”—Elizabeth F. Loftus, Ph.D., distinguished professor, University of California, Irvine; past president, Association for Psychological Science; author of Eyewitness Testimony

Why Should Anyone Be Led by You?-Robert Goffee 2006-02-07 Too many companies are managed not by leaders, but by mere role players and faceless bureaucrats. What does it take to be a real leader—one who is confident in who she is and what she stands for, and who truly inspires people to achieve extraordinary results? Rob Goffee and Gareth Jones argue that leaders don’t become great by aspiring to a list of universal character traits. Rather, effective leaders are authentic: they deploy individual strengths to engage followers’ hearts, minds, and souls. They are skillful at consistently being themselves, even as they alter their behaviors to respond effectively in changing contexts. In this lively and practical book, Goffee and Jones draw from extensive research to reveal how to hone and deploy one’s unique leadership assets while managing the inherent tensions at the heart of successful leadership: showing emotion and withholding it, getting close to followers while keeping distance, and maintaining individuality while “conforming enough.” Underscoring the social nature of leadership, the book also explores how leaders can remain attuned to the needs and expectations of followers. Why Should Anyone Be Led By You? will forever change how we view, develop, and practice the art of leadership, wherever we live and work.

I, Human-Samir Kohli 2016-02-11 Who am I? This question has defied answer since time immemorial! World famous psychologists and scientists have tried to find an answer to this question without success. In fact, you know me very well. You meet me daily, live with me, work with me, supervise me, make me work for you; and my mistakes cause disasters, in which you and I perish! You meet me as a father, mother, brother, sister, husband, wife, friend, lover, employer, employee... the list is endless. No venture or activity can ever be accomplished without me. You need me. You cannot get anything done without me. It is I with whom you want a relationship; who creates the greatest love story or heartbreak; makes any undertaking a success or a failure; is the single largest cost item in any company’s balance sheet; and matters the most in any activity. Yet, I am least understood and cared! Your inability to understand me leads to most of the organizational and interpersonal problems, even accidents and disasters, in the world today. Disasters, in relationships - between families, friends, colleagues and lovers; in work-place interactions leading to organizational conflicts; in development or implementation of policies, procedures or processes I cannot be relied upon to follow, leading to accidents; these result from your inability to understand me. I cannot be managed or controlled. I can only be led, motivated, mentored and developed. Love me, or hate me, you cannot live without me! You got me and the sooner you understand me, the better will it be for both of us! I am a human, and this... is my story.

The Zones of Regulation-Leah M. Kuypers 2011 "... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum’s learning activities are designed to help students recognize when they are in different states called “zones,” with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students’ understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others’ facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum’s learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD.”-Publisher’s website.

Revelation-Allen Daves 2013-12 The book of Revelation offers us an interesting theological dilemma. It states Rev 22:16. I Jesus have sent mine angel to testify unto you these things in the churches. Revelation also states it is "the true sayings" of Jesus and that it is "the testimony of Christ." If this is not "the gospel of Jesus Christ" then what is it and should we consider it accursed testimony of an angel? If it is not to be considered accursed, then it cannot be some other gospel message then what was already given previously. However, this is the conundrum, for if this is the gospel message, then why do so few understand it? There is a possibility which few consider but is the overall thesis of this apology. The reason people don't understand revelation is because they never understood what the gospel message was in the first place! In that case, where does that put those who claim it is not essential for salvation? Do you not find it quite curious that the most "Personally" given NT book By Jesus himself, is the least understood and given the least importance for Salvation in Christendom?...There are numerous preachers and bible exegetes but as Paul said ". . . I bear them record that they have a zeal of God, but not according to knowledge" . Most who profess the name of Christ are feeding on doctrines of devils and the ignorant. . There are, without question, many "qualified" teachers and scholars with many years of "dedication" and "solid education." However, teachers, no matter how well lettered or numbered in degrees; if obtained from others; who are just as equally ignorant in such matters, are just " blind leaders of the blind. And if the blind lead the blind, both shall fall into the ditch."
